

Annual Operational Permits

January 2019

Public Information Handout F-18

The International Fire Code requires certain types of operations or businesses that present greater risks of fire or life safety obtain an "Operational Permit" (IFC Section 105.1.2) in order to conduct an operation or a business. These permits can be issued for either a prescribed period or until revoked.

Operational Permit fees are \$125 annually (the fee is adjusted by a cost-of-living increase or decrease – CPI-W each January) with the following exceptions:

- Any hazardous material with multiple classifications shall be charged only once (annually)
- 2. No fees shall be charged for candles in a place of assembly or parade floats
- 3. Fees shall be waived for government agencies and non-profit organizations

Operational Permits are invoiced in January of each year and are issued on an "until-revoked" basis. These permits are typically issued at the conclusion of your annual inspection for the first year that a permit is required. The paper permit copy is permanent and will not be reprinted each year. It must be readily available on the premises. At the end of any inspection, if violations exist, your permit may be revoked until all violations are cleared by the Fire Prevention Officer. Some of the most common processes or conditions in Bellevue that require an Operational Permit are listed on the reverse side of this page.

Payment for the Operational Permits can be made in the following ways:

By Mail:

City of Bellevue - Service First

P.O. Box 90012 Bellevue, WA 98009

In Person:

Bellevue City Hall

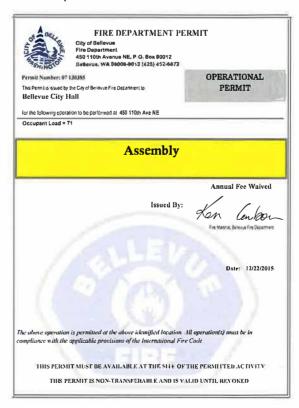

450 110th Avenue N.E. Bellevue WA 98004

By Phone:

425.452.6875

Balances not paid within 30 days of the invoice date are subject to a 1% monthly finance charge with a minimum charge of \$25 per month.

The ability to continue conducting an operation or a business is based on continued compliance with the permit conditions and payment of the Annual Operational Permit.

Required Operational Permits (for a complete list, including quantity/area thresholds, please see International Fire Code Section 105.6 as amended by Bellevue City Code Chapter 23.11):
